The Nuhn Header Series Pumps are the smoothest and strongest pumps on the market. They make mixing and transferring manure fast and efficient. Our 'keep it simple and rugged' design concept means that you can expect years of reliable service. The enclosed bearing system protects components from corrosive manure, to ensure the pump is always performing at its best.

The 8" to 4" nozzle creates a powerful vortex for agitation, and an unrivaled 50 psi jet stream. The Nuhn Header Series Pumps can transfer 7000 US Gal / Min The tractor can be slowed to between idle and 650 RPM, and still continue to pump between 3000 and 4000 US Gal / Minute, saving you time and money.

A Family Business Since 1902
TRIPLE PORTED, LOFTED HOUSING
• Having the liquid leave the housing in three spots allows for a narrow, large diameter fan that increases the velocity of the liquid, and reduces the amount of input power.
• The triple exit points also reduce side thrust on the bottom bearings, increasing seal and bearing life.

TAPERED FAN
• Angled fan directs liquid up as well as out while liquid is still spinning in housing.

MASSIVE AGITATION CAPACITY
• 8” to 4” for blasting distant crust
• 90° vertical movement
• 350° horizontal movement

7000 US GAL/MIN
• Full 8” flow through entire pump
• Smooth, long radius elbows ensure efficient flow of manure.

RADIO CONTROL
• 300 ft range
• Switch from “agitate” to “fill” without leaving the cab of the tractor.

OVERSIZED GEAR BOX WITH OIL COOLER

OPTIONAL

• WHEELED UNDERCARRIAGE
• 3-POINT HITCH
• HIGHWAY TRANSPORT CART
• ADDITIONAL RADIO REMOTE
